

AnyDoc®

MANAGEit™

Real-time monitoring
to optimize your workflow

Manage Distributed Capture & Processing

Complete Monitoring of your Data Capture and Processing Operation.

Adjust and optimize processes and resources before problems arise.

It's simple, really: MANAGEit™ is the tool for planning and optimizing your OCR for AnyDoc® and CAPTUREit™ workflow. With MANAGEit™'s ability to peer into your data capture and processing operation (whether it's local or remote), you'll have the data you need to improve processes—heading off trouble before it becomes just that. And, you'll be able to make sure resources are used to their full capacity.

MANAGEit™ provides real-time monitoring, graphical analysis, performance alerts and reporting for your OCR for AnyDoc® processes. A myriad of processes can be tracked: batch level status, station activity, pending work and remote user log-ons, just to name a few. Tweak a process, and see the result—instantly.

You can also define your own alerts, delivered to administrators via instant messaging or email. Alerts warn administrators of possible production slow-downs, allowing for proactive resolution before your workflow is impeded.

Receive detailed reports on throughput, accuracy and productivity. Produce graphs for high-level data, like a complete OCR for AnyDoc® solution overview, or drill down to statistics for individual workers and stations. MANAGEit™ also includes a starter set of Business Objects™ Crystal Reports® with automated email distribution, in PDF format.

Goodbye

Sudden, unexpected processing downtime, backlogs and a lack of processing environment information and control.

Hello

Real-time views of workload, operations and processing. Alerts before problems occur. And historical processing reports to aid in review and planning.

Production

Supervisor: “Now I can spot bottlenecks quickly with the custom alerts, insuring the work is done on-time.”

- Tighter control** – monitor local and remote verification performance.
- Less stress** – create a more predictable production environment.
- Meet deadlines** – manage your workload, ensure priorities are met and complete work on time.
- Maximize resources** – alerts keep you informed to eliminate resource downtime.

With MANAGEit™ you can:

- » Monitor and manage pending work in your system and display job counts for each family and phase, including a totals line for all families.
- » See the instantaneous results of workflow adjustments and other actions.
- » Review work level fluctuations to better manage workload.
- » Set custom alerts to notify administrators when threshold minimums or maximums are violated.
- » Schedule reporting functions to run automatically, saving you time for other activities.
- » Utilize a starter set of standard Crystal Reports—and define your own.
- » Customize the screen view by displaying or hiding columns according to your needs.
- » Monitor multiple OCR for AnyDoc® configurations.
- » Avoid work backlogs by monitoring and controlling pending work.
- » Ensure only authorized employees can make changes to workflow batches.
- » Monitor CAPTUREit™ and VERIFYit™ station performance and report on history.

Manager: “Using MANAGEit™ reports, I quickly saw patterns emerge in the workflow production. And I was able to put together a plan to get the right resources in the right places at the right time. Now, we’re much more efficient.”

Automation Process Diagram

AnyDoc®MANAGEit™

Gain a powerful edge throughout your organization.

Optimize your resources and workflow. MANAGEit™'s real-time monitoring, views and performance alerts drive efficiency across your OCR for AnyDoc® data capture organization—regardless of size and distribution.

anydocmanageit.com

Key Features

» **Optimize resource efficiency**

Monitor and manage workflow with real time information. See the instantaneous results of streamlining or corrective action for more efficient productivity. As your business fluctuates, you can see the impact on production activity and create plans to better manage sudden workload changes. Monitor your resources online and in real time: employees, workload, workstations and more.

» **In control with better decision making**

Production thresholds can be set in such a wide number of processes that it's like having a second person watching workflow for you. As real-time values for pending work, station performance and operator production violate thresholds, alerts are triggered to inform the right people instantly via email or instant messaging to initiate corrective action.

» **Scheduler for task automation**

Schedule time-consuming database maintenance and reporting functions to run automatically, saving you time for other management activities. Automated tasks can run during off-peak hours or at the convenience of a user-defined schedule.

» **Reporting on historical performance**

Five standard Crystal Reports provide detailed information and the Crystal Reports Viewer has the ability to accept an unlimited number of Crystal Reports developed by you. Reports can also be scheduled for automatic recurring email distribution in PDF format, to the correct individuals.

» **Monitor CAPTUREit™ and VERIFYit™ processing**

Unify performance standards in every location. Remote verifiers can now be more easily managed to the same performance standards as on-site operators. MANAGEit™ reporting also captures this extended control.

» **Customized display columns**

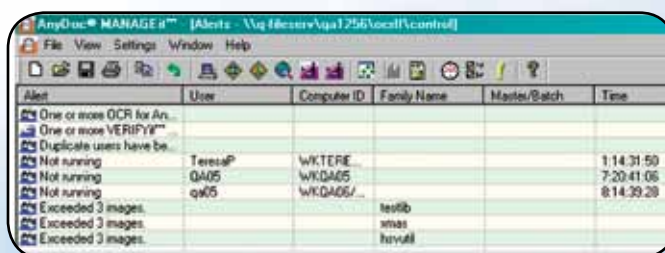

Simple mouse-click convenience allows columns to be displayed or hidden depending on your needs. Customizable display screens allow you to set the most efficient views of your activity.

» **Ability to monitor multiple OCR for AnyDoc® configurations**

Simply point and click to a different OCR for AnyDoc® control path, and from one console you have the power to monitor multiple production environments.

» **Pending work alerts**

Proper pending work flow is essential to operator efficiency and job satisfaction. The batch-age and number-of-pending-batches alerts are two highly effective warnings to maintain customer contract obligations and prevent backlogs. Steady batch processing is always more efficient than dealing with unforeseen backlogs that jeopardize deadlines.

Other alerts include:

Workstations operating under different versions

User name logged into more than one station

Required drive is unavailable

User is not in the product

Machine is idle

No work in the system

Process time exceeded

Batch age exceeds a specified time

Batch suspension

Customer Comments

"I never thought it would be this easy to process my paper documents..."

"By switching to an automated system, we saw a 60% leap in productivity..."

"Now the turnaround time for each document...is immediate!"

"We've seen ROI even sooner than we projected..."

"Things are running much smoother... thanks to AnyDoc Software."

Complete Line of Products

AnyDoc Software has been developing award-winning document, data capture, and classification solutions since 1989. Thousands of companies worldwide rely on AnyDoc solutions to eliminate millions of hours of manual data entry while improving productivity and accuracy. Our products and solutions all operate from the ease-of-use, stability, and enhanced functionality obtained from years of experience and innovation.

Software Products

OCR for AnyDoc®

Automatically capture data from nearly any business document. Eliminate the costs and errors associated with manual data entry.

Infiniworx®

Simplify and automate how your company processes documents with this innovative drag-and-drop workflow development platform.

AnyDoc®CAPTUREit™

Scan documents from anywhere in the world, perform quality assure, and send images over the Internet to a central location for processing.

AnyDoc®DESIGNit™

Easily design your own professional forms for printing or to use as a template in OCR for AnyDoc processing with easy-to-use click and select toolbar features.

AnyDoc®EXCHANGEit™

Convert extracted data to a variety of file formats for use among multiple applications. EDI, XML, ASCII, and others are available, as are APIs to leading document management solutions.

AnyDoc®MANAGEit™

Optimize your AnyDoc processing with real-time monitoring of batch level status, station activity, pending work, and more.

AnyDoc®VERIFYit™

Perform data verification at a central location or off-site—allowing you to save valuable office space. Ensure data accuracy, no matter where your employees are located.

Market Solutions

AnyDoc®CLAIM™

Automatically process CMS-1500, UB04, and dental healthcare claim forms.

AnyDoc®CLASSIFY™

Automatically sort, batch, and route all your documents, quickly and easily.

AnyDoc®EOB™

Automatically capture, validate, and balance EOB data from all your payers—and increase productivity and decrease processing time while lowering costs.

AnyDoc®INVOICE™

Automatically process invoices to lower manual data entry costs and turn incoming invoices around in hours instead of days.

AnyDoc®REMIT™

Automatically capture remittances and checks and the associated critical data for much quicker input into your financial or ERP systems.

AnyDoc®Patient Records™

Minimize human error by automatically identifying, sorting, indexing, and capturing information from patient records.

AnyDoc®MORTGAGE™

Get critical loan information into your mortgage processing system quickly and with even greater accuracy by minimizing manual data entry and pre-sorting.

AnyDoc®NOTICE™

Provides quick identification and data capture of insurance policy notices—speeding processing and increasing opportunities for revenue generation.
